Projects

Mental Fitness and Wellbeing App Jul 2024 - Aug 2024

ZevZone is an integrated mental wellness platform that leverages guided meditations, AI-powered chatbot support, data-driven mood tracking, and interactive relaxation modules to deliver a holistic digital mental health solution.

Weather App Jun 2024 - Jul 2024

Weather App is a responsive web application built with React, Vite, Tailwind CSS, and Leaflet, integrating a weather API to deliver real-time weather data with interactive map visualization and seamless performance across devices.

CyberSheild Mar 2025

CyberShield is a cybersecurity platform offering features like an email security extension, deepfake detection, and a developer submission system that allows vetted tools to be published after review, fostering a collaborative and secure digital ecosystem.

LungGuard

LungGuard is a Python-based application designed for lung cancer prediction, utilizing machine learning models to analyze input data and provide risk assessments for early detection support.

Mumbai, Maharashtra
